- 2. (Original) A pharmaceutical composition according to claim 1, wherein the selective serotonin uptake inhibitor is selected from the group consisting of fluoxetine, paroxetine, duloxetine, sertraline, escitalopram and citalopram.
- 3. (Original) A pharmaceutical composition according to claim 1, wherein the sodium channel blocker is selected from the group consisting of lamotrigine, crobenetine, oxcarbamazepine and phosphenyloin.
- 4. (Original) A pharmaceutical composition according to any of claims 1, 2 or 3, wherein the selective serotonin uptake inhibitor is fluoxetine and the sodium channel blocker is lamotrigine.
- 5. (Withdrawn) A pharmaceutical composition according to any of claims 1, 2 or 3, wherein the selective serotonin uptake inhibitor is fluoxetine and the sodium channel blocker is crobenetine.
- 6. (Original) A pharmaceutical composition according to any of claims 1, 2 or 3, wherein the selective serotonin uptake inhibitor is sertraline and the sodium channel blocker is lamotrigine.
- 7. (Withdrawn) A pharmaceutical composition according to any of claims 1, 2 or 3, wherein the selective serotonin uptake inhibitor is sertraline and the sodium channel blocker is crobenetine.

8-15. (Canceled).

16. (Currently Amended) A method for the treatment and/or prevention of a disease occurring in a mammal, said disease involving chronic pain, epilepsy or deriving from disorders and/or injuries of the motor system, characterized in that a therapeutically effective amount of pharmaceutical composition comprising a sodium channel blocker

and a selective serotonin uptake inhibitor is given to the subject in need of such treatment.

- 17. (Withdrawn) A method for the treatment and/or prevention of drug or alcohol addiction, incontinence of faeces and urine, inflammation, itching, intracranial edema, ischemia and/or subsequent damage caused by reperfusion or retinopathy, as a complication of glaucoma in mammals, characterized in that a therapeutically effective amount of pharmaceutical composition comprising a sodium channel blocker and selective serotonin uptake inhibitor is given to the subject in need of such treatment.
- 18. (Currently Amended) A method according to claim 16 or 17 24, wherein the selective serotonin uptake inhibitor is selected from the group consisting of fluoxetine, paroxetine, duloxetine, sertraline, escitalopram and citalopram.
- 19. (Currently Amended) A method according to claim 16 or 17 24, wherein the sodium channel blocker is selected from the group consisting of lamotrigine, crobenetine, oxcarbamazepine and phosphenyloin.
- 20. (Currently Amended) A method according to claim 16 or 17 24, wherein the selective serotonin uptake inhibitor is fluoxetine and the sodium channel blocker is lamotrigine.
- 21. (Withdrawn) A method according to claim 16 or 17, wherein the selective serotonin uptake inhibitor is fluoxetine and the sodium channel blocker is crobenetine.
- 22. (Currently Amended) A method according to claim 16 or 17 24, wherein the selective serotonin uptake inhibitor is sertraline and the sodium channel blocker is lamotrigine.
- 23. (Withdrawn) A method according to claim 16 or 17, wherein the selective serotonin uptake inhibitor is sertraline and the sodium channel blocker is crobenetine.

24. (New) A method for the treatment and/or prevention of chronic pain or epileptic seizures, characterized in that a therapeutically effective amount of pharmaceutical composition comprising a sodium channel blocker and a selective serotonin uptake inhibitor is given to the subject in need of such treatment and/or prevention.
